

Meet 150 Makers Working At The Intersection Of Art Science Technology

The world of art, science, and technology is constantly evolving, and there are now more makers than ever before who are working at the intersection of these disciplines. These makers are pushing the boundaries of what's possible, creating works of art that are also scientifically and technologically innovative.

The Art of Tinkering: Meet 150+ Makers Working at the Intersection of Art, Science & Technology by Karen Wilkinson

In this article, we'll introduce you to 150 of these makers. They come from all over the world and work in a wide variety of media, from painting and sculpture to robotics and virtual reality. But what they all have in common is their passion for using art, science, and technology to create something new and different.

1. Ani Liu

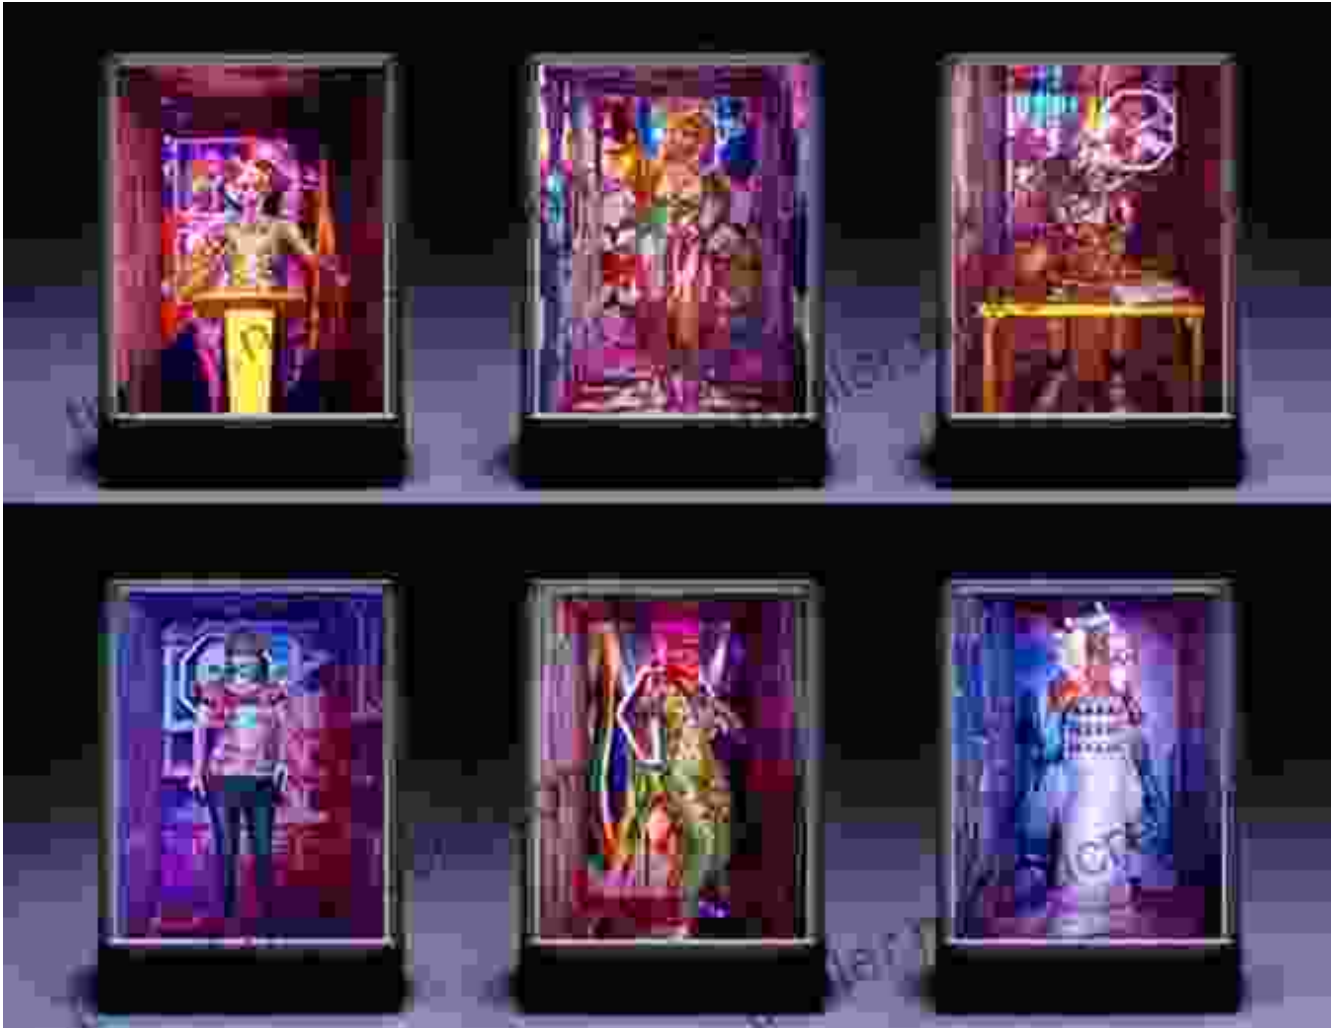

Ani Liu is a Chinese artist who creates interactive installations that explore the relationship between humans and technology. Her work often uses sensors and other electronic components to create immersive experiences that respond to the viewer's movements and interactions.

2. Ayah Bdeir

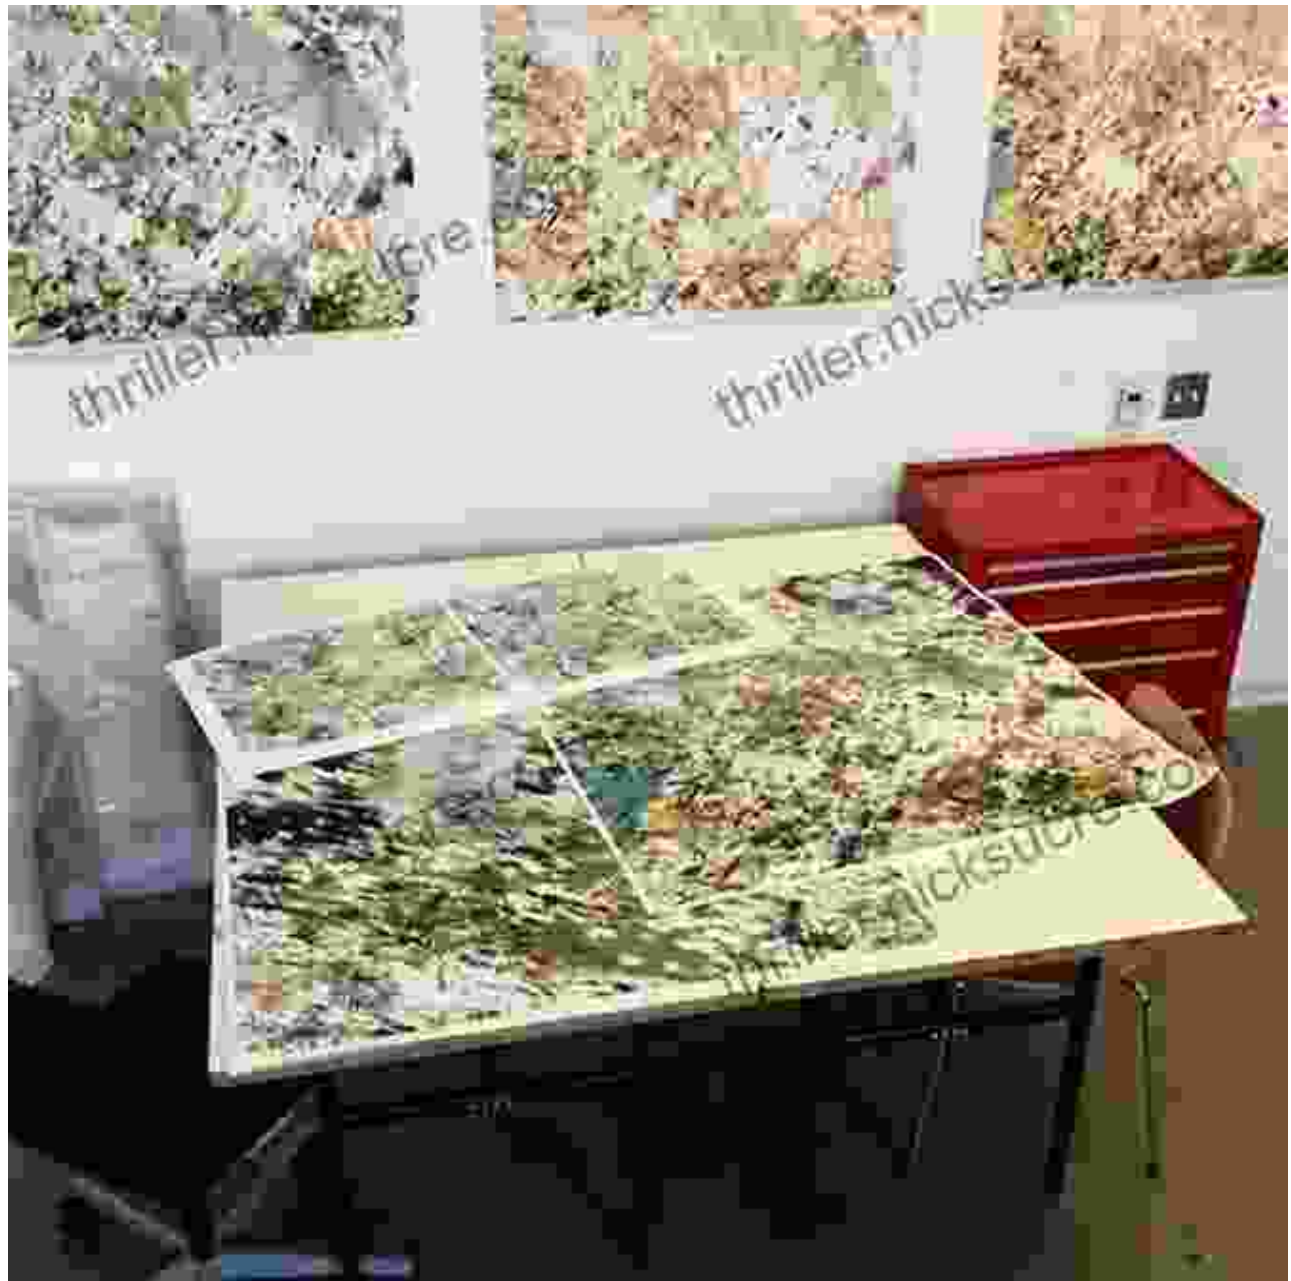

Ayah Bdeir is a Lebanese-Canadian artist and designer who works at the intersection of art, science, and technology. Her work often explores the social and environmental implications of new technologies.

3. Carla Gannis

Carla Gannis is an American artist who creates sculptures and installations that explore the relationship between the body and technology. Her work often uses medical imaging and other technologies to create works of art that are both beautiful and thought-provoking.

4. Casey Reas

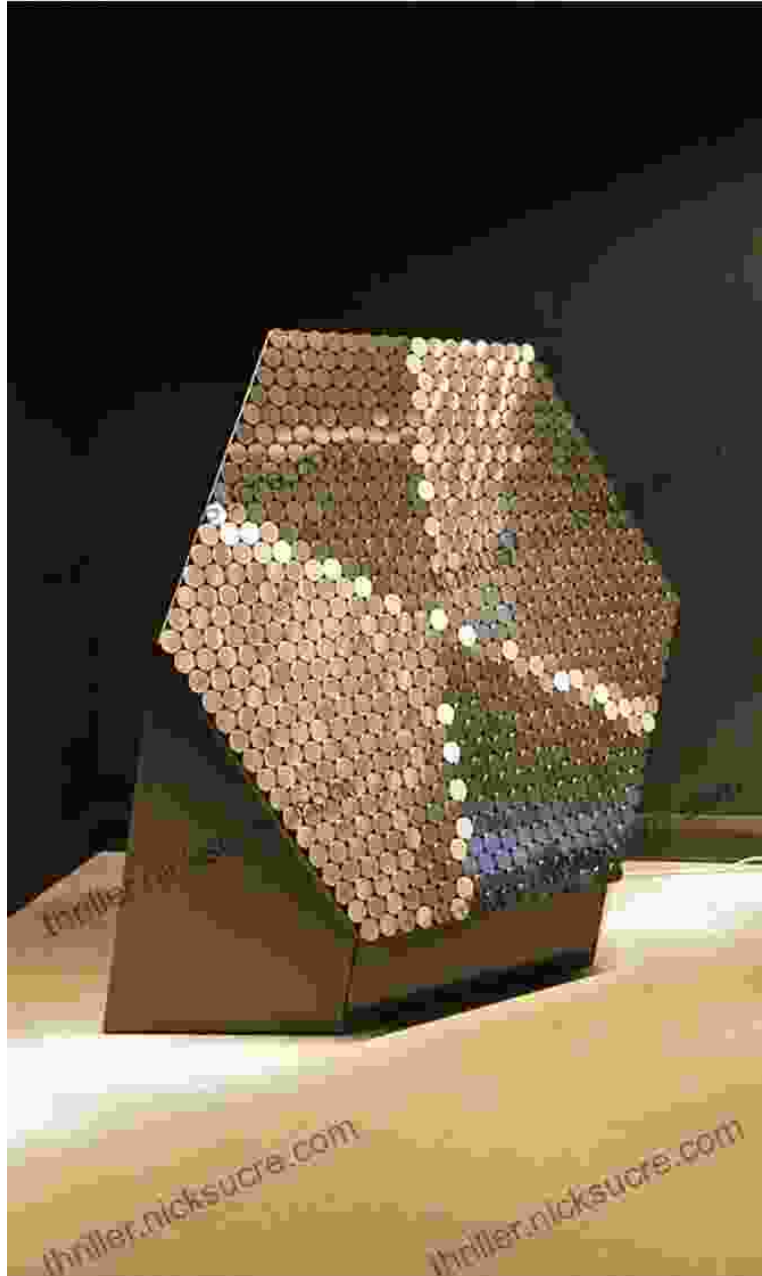

Casey Reas is an American artist and programmer who creates generative art and software tools for artists. His work often explores the relationship between art and technology, and he is a co-founder of the open-source software project Processing.

5. Chang-Jin Lee

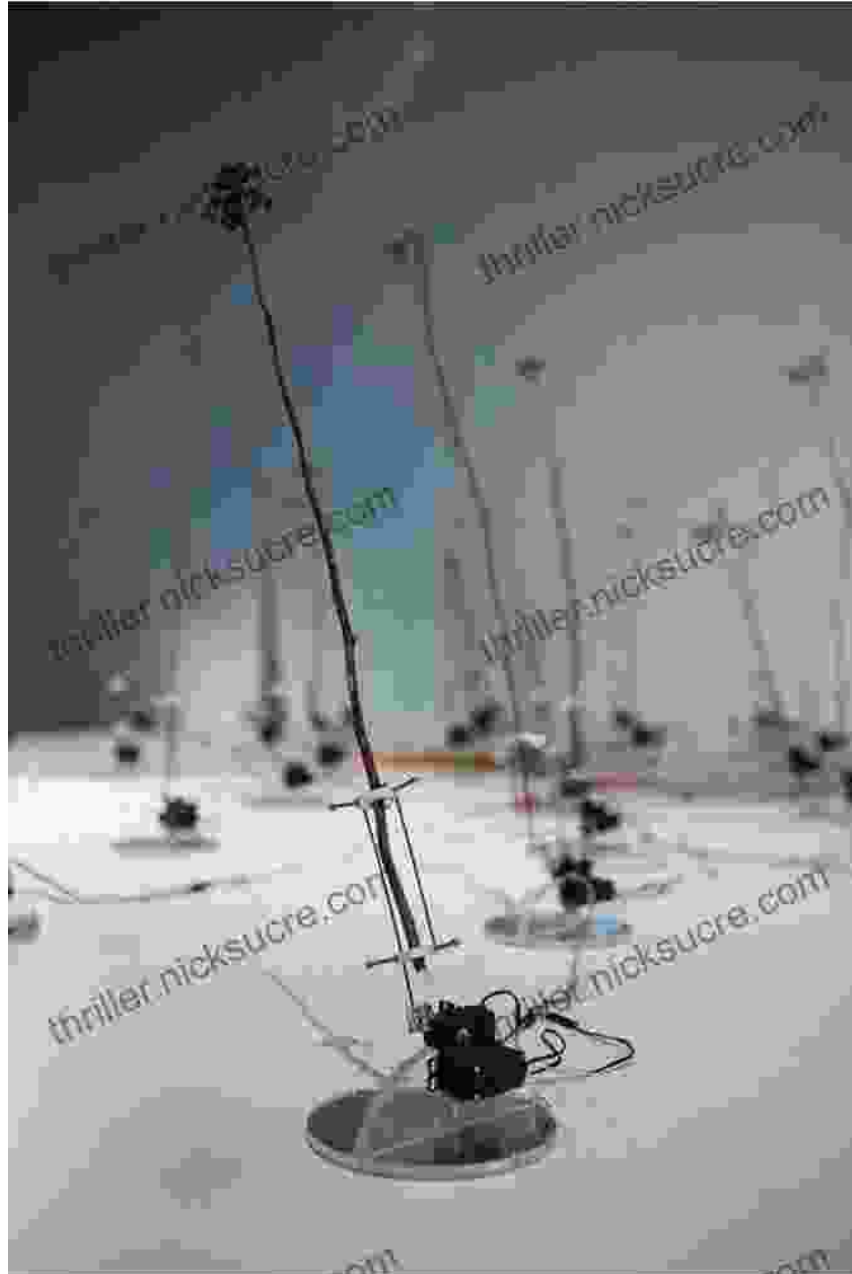

Chang-Jin Lee is a Korean-American artist who creates interactive installations that explore the relationship between humans and the environment. His work often uses sensors and other electronic components to create immersive experiences that respond to the viewer's movements and interactions.

6. Daniel Rozin

Daniel Rozin is an Israeli artist who creates kinetic sculptures and installations that explore the relationship between art and science. His work often uses motors and other mechanical components to create works of art that are both visually stunning and thought-provoking.

7. David Bowen

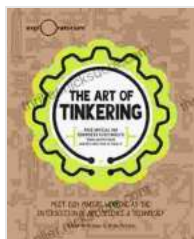

David Bowen is an American artist who creates sculptures and installations that explore the relationship between art and technology. His work often uses robotics and other electronic components to create works of art that are both beautiful and thought-provoking.

8. Deborah Sussman

Deborah Sussman is an American artist who creates sculptures and installations that explore the relationship between art and the environment. Her work often uses recycled materials and other sustainable materials to create works of art that are both beautiful and thought-provoking.

9. Dora Budor
