Gameplay

Paladins is a fast-paced, action-packed shooter that emphasizes teamwork and strategy. Players must work together to achieve their objectives, and they must use their champions' unique abilities to their advantage. The game features a variety of game modes, including:

- **Siege:** A 5v5 game mode in which teams compete to capture and hold points.
- **Payload:** A 5v5 game mode in which one team must escort a payload to the enemy team's base.
- **Team Deathmatch:** A 6v6 game mode in which teams compete to get the most kills.
- **Onslaught:** A 4v4 game mode in which teams compete to capture and hold points.

Paladins also features a variety of champions, each with their own unique abilities and playstyles. Players can choose from a variety of champions, including:

- **Tanks:** Tanks are the frontline fighters of Paladins. They are slow and have a lot of health, but they also have powerful attacks and abilities that can help their team win.
- **Damage:** Damage champions are the DPS of Paladins. They have high damage output, but they are also relatively fragile. Damage champions are best used to take down enemy champions and objectives.
- **Support:** Support champions are the healers of Paladins. They can heal their teammates, buff their allies, and debuff their enemies. Support champions are essential for keeping their team alive and winning games.
